

SemBioSys Genetics is a dynamic, Calgary-based biotechnology company. We are seeking a highly motivated individual to join a multidisciplinary team of scientists and business professionals in an energetic commercial research and development environment.

Plant Transformation Position (Job #2010-02)

Location

Calgary, Alberta, Canada

Description

We are looking for a highly motivated plant tissue culture person for a full-time position in our plant transformation group. The qualified candidate will be responsible for the production of transgenic plants, improving our current transformation methods and related responsibilities. Duties include production of transgenic safflower plants, some media preparation and related greenhouse and growth chamber work.

Qualifications

- B.Sc or M.Sc in plant sciences or related discipline
- Experience in plant tissue culture methods
- Experience in plant transformation systems

Candidates must have the ability to balance working both independently and within a team-based research environment. Successful candidates will have excellent communication, organizational, computer and record keeping skills. Preference will be given to individuals with significant experience in plant tissue culture and transformation methods. Salary will be competitive and commensurate with qualifications and experience. SemBioSys Genetics Inc. offers a full benefits package including a savings plan and stock options. Please visit our web site at www.sembiosys.com for a complete description of SemBioSys Genetics Inc.

Mail, fax or e-mail your resume, using MS Word, indicating your name and the job number (2010-02) for which you are applying, by August 31, 2010 to:
